DESIGN AND MANUFACTURE OF GRILLES AND SPECIAL AIR CONDITINING COMPONENTS

## COMBINATION EXTERNAL WALL GRILLE

# BN-B

# BN-B

## DESCRIPTION

BN-B is a combination of a weather and a gravity grille. In the front there is a regular BN grille with fixed blades in 45° angle and in the back a frame with gravity blades. After the gravity blades there is a 6X6mm wire mesh. For installation in external walls to protect the HVAC equipment or the building interior from the rain, leaves, insects, small animals and other objects. The movement of the air from inside to outside of the building is only allowed.

## MATERIALS

The BN grille is made from aluminium anodized or electrostatically painted in RAL color. The wire mesh is from galvanized steel. The frame of the gravity blades is from galvanized steel. The gravity blades are from plastic or anodized aluminium.

When the gravity blades are made from anodized aluminium we have bigger strength and longer operational life. When they are made from plastic they are lighter and they are less noisy in the opening-closing.

## FIXING

The grille BN-B is fixed in the external wall with visible screws in the external flange.

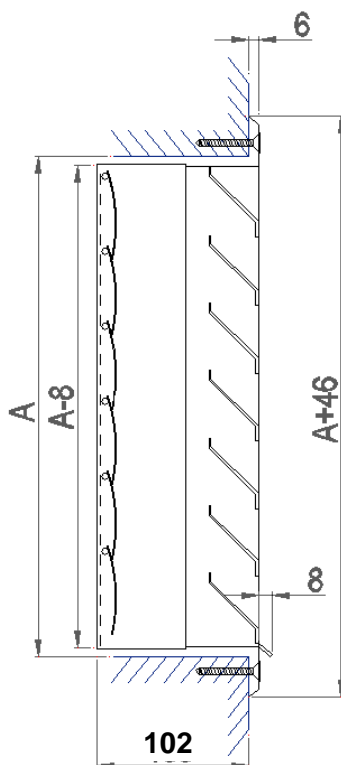

## WAY OF ORDER

BN-B- - - X  
Width X Height  
→ **AL** for anodized aluminium blades or **PVC** for plastic blades.  
→ Blank for anodized aluminium BN-B grille and **RAL XXX** (XXX: the 4-digit color code) for painted BN-B grille.
